Aquaculture Pontoons

THISTLE GROUP

Thistle Marine have witnessed a number of fish farm operators using regular floating walkway sections bolted together to form large pontoon sections for loading and transporting feed bags out to fish farm pens. Following a review of their suitability we have designed a bespoke, modular product which allows the handling crane to be securely mounted to the pontoon structure. Further standard sections are then utilised to create the load area. As the structure is modular, different shapes, sizes and load capacities of pontoons can be created.

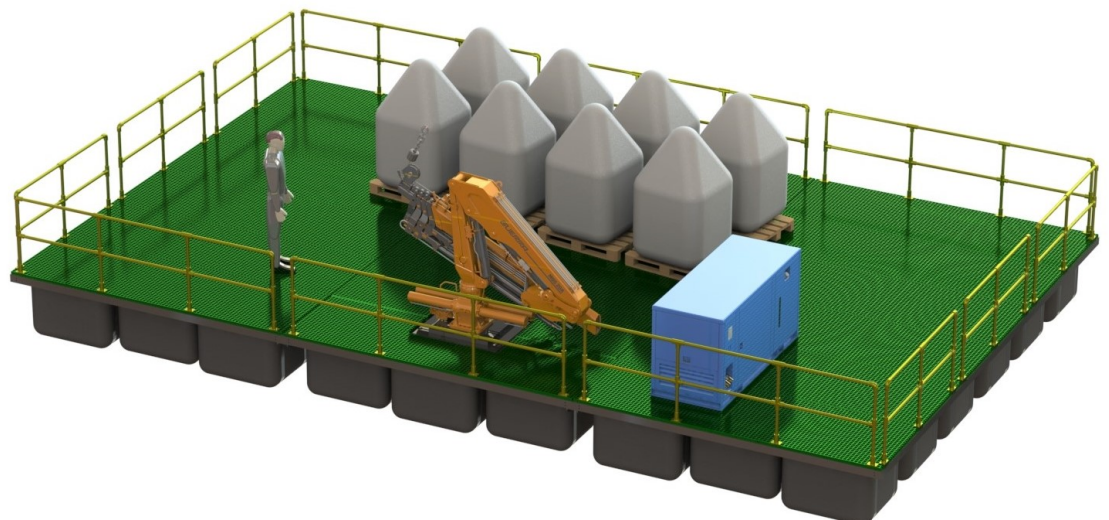

Typical pontoon structure with knuckle boom crane

Key Points:

- Designed & manufactured for long term use in a marine environment.
- Specific load bearing section for certified work crane mounting.
- Modular system allows various sizes of pontoon to be created.
- Supplied with removable handrails.

Overview	
Dimensions of each section (L W H):	3.9 x 2.4 x 0.9 m
Standard section weight in air:	350 kg
Standard section payload:	4,000 kg
Typical size & payload	12 m x 7 m / 30,000 kg

Contact us for your requirements as we have various specifications and sizes available.
