3,000 kg Capstan

THISTLE GROUP

The 3,000 kg capstan is a vertical rotating drum used for a variety of rope pulling activities mainly on-board boats. It is hydraulically driven and extremely rugged for harsh environment marine use. The capstan drum is aluminium and the pedestal marine grade steel. The capstan pedestal features side attachment points to allow attachment to the boat gunwale where required. Normally supplied with Thistle foot pedal controller which removes requirement to fit hydraulic control valve below deck.

Technical Data	
Maximum Line Pull:	3,000 kg
Maximum Rotational Speed:	30 rpm
Maximum Linear Line Speed:	0.45 m/s
Working Pressure:	210 bar
Maximum Oil Flow:	45 LPM
Total Weight:	240 kg

Key Points:

- Small footprint
- High line pulling power
- Rugged construction
- Has integral fixing points for support to boat gunwale.

Available Options:

- Pedestal can be manufactured to your required height.
- Can be supplied with Thistle foot pedal
